Erin,

I haven't contacted you before. I am ICF's project manager on preparation of the BDCP conservation strategy.

I am writing in reference to the "red flag" comments on BDCP that EPA provided to Reclamation on April 4. Some of these comments addressed Conservation Measure 13, which concerns methylmercury. My lead author on that measure, Erin Healy, would like to talk to the commenter in order to get clarification on some of the comments. Could you provide contact information and authorization for Erin to talk to or email the commenter?

Chris
